

## Descripción del Curso

In this course, you will learn about FortiSOAR architecture, and how to deploy, configure, manage, operate, and monitor FortiSOAR in a SoC environment. You will learn about various system customization options, HA deployment, security management using role-based access control (RBAC), and various system monitoring tools.

---

## Quien debe asistir

This course is intended for cybersecurity professionals responsible for planning, deploying, configuring, and managing FortiSOAR deployments in a SoC environment.

---

## Requisitos previos

You must have an understanding of the topics covered in the following course, or have equivalent experience:

- NSE 4 *FortiGate Security*

Familiarity with SOC technologies and processes is recommended.

---

## Agenda

1. Introduction to FortiSOAR
  2. Device Management
  3. High Availability
  4. System Configuration
  5. Searching and Upgrading
  6. System Monitoring and Troubleshooting
- 

## Objetivos

After completing this course, you should be able to:

- Identify challenges of security teams, and assist security teams with SOAR best practices
- Identify the role of SOAR in assisting security teams

# FortiSOAR Administrator

- Describe the basics of SOAR technology
- Manage licenses
- Deploy and manage FortiSOAR VM
- Configure teams, roles, and users
- Configure authentication
- Schedule the purging of audit logs and executed playbook logs
- Configure playbook recovery
- Configure environment variables
- Configure company branding
- Configure system fixtures
- Monitor and manage audit logs
- Use the configuration manager
- Monitor system resources
- Deploy, configure, manage, and troubleshoot a FortiSOAR high availability cluster
- Identify the types of logs used for troubleshooting
- Troubleshoot key services and processes on FortiSOAR

---

## Requisitos del Sistema

If you take the online format of this class, you must use a computer that has the following:

- A high-speed Internet connection
- An up-to-date web browser
- A PDF viewer
- Speakers or headphones
- One of the following:
  - HTML 5 support
  - An up-to-date Java Runtime Environment (JRE) with Java Plugin enabled on your web browser

You should use a wired Ethernet connection, *not* a WiFi connection. Firewalls, including Windows Firewall or FortiClient, must allow connections to the online labs.

# FortiSOAR Administrator

## Certificación

This course prepares you for the NSE 6 FortiSOAR Administrator certification exam.
